Art and Music

Art and music are two important parts of an education that can be studied and explored in an endless variety of ways. Unlike math or science, the learning objectives for art and music cannot be as neatly quantified or defined. The main goal of art and music is to enjoy them and use them to glorify God. We have many great classes on SchoolhouseTeachers.com that can help you do just that!

If you’re interested in specific academic goals for art and music, you’ll find some general guidelines listed on the following pages. It is often most helpful if you naturally incorporate art and music into other subjects whenever possible (such as studying the art of ancient Egypt or the music of Russia alongside history and social studies).

Whenever possible, take field trips (either physical or virtual) with your children to explore art and music in a living, breathing way. Visit a museum, enjoy a musical performance, watch tradesmen in action, and dig in and try as many styles and techniques as you have time and the opportunity to enjoy!

Keep in mind as you explore art that it can cover a wide variety of techniques and media. It includes drawing and painting, but it also includes animation, architecture, casting, ceramics, computer graphics and applications, construction, dance or other creative movement, digital arts, drama (including mime, storytelling, and technical aspects of theater), drawing, film, graphic design, improvisational music, instrumental music, metal sculpture, mosaics, photography, printmaking, sculpture, textiles and fiber art, and much more.

Another integral part of art and music studies is reading biographies of famous artists and composers. You can find suggested reading lists about architecture, music, art, and art history in our Monthly Book Lists for Families section by Michelle Miller. Enjoy!

Language arts is a broad heading that can incorporate many subjects depending on the approach taken. It varies from one curriculum to another, but often found under language arts are phonics/reading, reading comprehension, handwriting, literature, writing and composition, grammar, listening and speaking skills, and research skills.

One important element of language arts curricula is that the skills learned early in an education (such as capitalization and punctuation rules) are continually used throughout the student’s journey. Even if the specific skills are not repeated in this scope and sequence each year, it is understood that the student is to continue to use what he or she has learned previously, reviewing as necessary.

Reading:

When possible, have your student read as many varied types of materials as he or she can. For prekindergarten and kindergarten emerging readers, creating a print-rich environment is important. Manipulating letters to sounds and sounds to words are the building blocks for reading. At this level, everything is readable—cereal boxes, signs, traditional text, names, etc.

In first-third grade, types of reading to become familiar with might include fiction, nonfiction, legends, fables, folktales, fairy tales, poetry, calendars, recipes, and hymns. In 4th-5th grade, this can expand to include classic and contemporary literature, magazine articles, and newspapers. By 6th grade, readers should be exploring novels, short stories, biographies, autobiographies, plays, essays, and the classics.
Spelling

Kindergarten-12th Grade

Schoolhouse Spelling provides a full K-12 spelling curriculum on SchoolhouseTeachers.com.

For extra spelling fun, explore the spelling-themed games that are part of the Everyday Games series.
Literature (9th-12th)

High school literature is often based around themes or historical time periods or regions. An emphasis on reading with a sense of history and critical evaluation and response to what is read is generally stressed. It is also good to be aware of prospective colleges’ recommended reading lists and incorporate texts from these lists when appropriate.

Currently, SchoolhouseTeachers.com offers two tracks for Literature in this scope and sequence, but as with all classes on our site, you may choose to do any class at any time. These are simply two options to consider.

Our World Book Advanced library offers Pathfinders for advanced students interested in independent study. The Pathfinder “Literature” explores types of literature, movements in literature, and the literature of many nations of the world. The Pathfinder “Poetry” explores the lives of numerous famous poets from around the world, famous poems, and forms of poetry.
Literature

10th Grade (Traditional)

Literature in 10th grade is often focused on world literature from classic to contemporary with a careful evaluation of worldview. Works can be studied in chronological order or studied by region.

- Suggested authors for this grade include Dickens, Browning, Millay, Holmes, Poe, Doyle, Yeats, Tolstoy, Herbert, Homer, Aesop, Virgil, Foxe, Luther, Milton, Bunyan, Newton, and Machen
- Suggested classics for this grade include *Silas Marner*, *Henry V*, *The Taming of the Shrew*, and *Antigone*

On SchoolhouseTeachers.com

World Literature and Cultures: thirty-six weekly lessons  
High School Literature from a Biblical Perspective: thirty-six weeks  
Literature:*The Odyssey* by Homer  
Literature:*Julius Caesar* by William Shakespeare

The Writing unit on “Three Questions” by Leo Tolstoy helps students analyze this folk tale.
Literature

10th Grade (Advanced)

Literature with a focus on British literature.

- Suggested authors for this grade include Wordsworth, Scott, Coleridge, Burns, Tennyson, Bunyan, and Shakespeare
- Suggested classics for this grade include *Robinson Crusoe, Macbeth, Othello, Hamlet, The Pilgrim’s Progress*
- Additional suggested classics for this grade that students should be familiar with key portions of include *Beowulf, Canterbury Tales, and Paradise Lost*
- The history of British literature should also be explored, including key developments in the following periods: Anglo-Saxon, Medieval, Elizabethan, Puritan, 18th century, Romantic, Victorian, and modern

On SchoolhouseTeachers.com

- **Literature: A Tale of Two Cities** by Charles Dickens
- **Literature: The Great Divorce** by C.S. Lewis

- **Selected Works of Charles Dickens**: 18-week advanced high school literature course that examines five classic Charles Dickens works as well as a biography of the author

- **High School British Literature**: 36-week course that takes an in-depth look at key periods in the history of British literature from Old English and medieval through modern and postmodern

Continue to use the critical analysis skills learned in previous literature studies by applying them to the titles of the student’s choice (see suggested authors above).
Writing and Composition

We encourage you to incorporate writing in as many subjects as you can. Students can write recipes, create historic journals, write instructions for how to program a computer, keep a journal, etc. The possibilities are endless and do not need to be confined to a portion of a language arts curriculum.

*Sparkling the Noggin: Creative Writing with Pictures* is a fun encouragement for writers in 4th-7th grade, and *Into the Elements* is a 3-hour video course for 6th-10th grade about sharing life-changing truth by learning the storytelling lessons the Bible teaches.

Please note: The focus of the writing and composition section of this scope and sequence is on creativity and composition, not the physical act of writing. If your child struggles with the physical act of writing, please take a look at Judi Munday’s *Special Needs Lessons 15 and 16* for alternative ways you can help your child express his or her thoughts.
Writing and Composition

7th-12th Grade

In junior high and high school, writing is an integrated part of most subjects. Some students may wish to focus on writing classes tailored to a specific interest such as playwriting or fiction writing. This is also the time when some students enjoy exploring the history of the English language as it has changed over the centuries. In addition to developing and polishing their writing skills with cross-curricular assignments, students also should learn:

- to write a letter to the editor
- to appropriately cite quotations and sources
- to paraphrase material while avoiding plagiarism
- to be familiar with word processing/publishing software
- to assess the credibility and accuracy of sources
- to use parallelism in their writing where appropriate
- to write webpages and blog posts
- to write a resume
- to write an analytical essay
- to write an interior monologue for a character
- to create and deliver a multimedia presentation

A large number of writing and composition topics are explored in the following classes, though depending on the classes chosen and the interests of the student, you may wish to add writing a specific type of piece such as a letter to the editor or blog posts.

Students can even have fun *reading* about grammar! Check out the [Monthly Book Lists for Families](https://www.schoolhouseteachers.com/reading/grammar) all about Spelling and Grammar.
Listening and Speaking Skills

4th-12th Grade

Once the foundation for good speaking skills is laid, there is no end to where a student may go with it. It is good practice for the student to deliver a portion of his or her work orally, whether it be a book report, a play, or the recitation of poetry using clear diction, making appropriate eye contact, and speaking at an appropriate volume. As students get older, it is important they learn to not only give but also analyze oral presentations by drawing conclusions, asking questions, and critiquing messages for bias, fallacies, opinion cited as fact, and unsupported generalizations. They should also practice taking coherent notes from an oral presentation.

Every curriculum approaches health a little differently. Some incorporate it with science from the very beginning. Some incorporate it with science and anatomy in higher grades. You may enjoy Michelle Miller's Monthly Book Lists for Families selection for Healthy Reads! Famous Doctors, Nurses, and Researchers. Below, you will find an outline of some suggested health topics to incorporate each year.

You’ll find in-depth information about how to determine your child’s fitness goals and guide them on their way to developing and maintaining a healthy lifestyle in our Physical Education Center, where we have material for all ages. We’ll also help you set goals such as:

- Engaging in physical activity with competence and confidence
- Experiencing physical activity in a variety of environments
- Understanding the importance and benefits (physical, emotional, social) of a lifestyle that includes physical activity
- Incorporating regular physical activity into your family’s lifestyle
- Achieving and maintaining physical fitness
Health

7th-12th Grade

Many health curricula either introduce or expand on the topics of sex education, tobacco use, drugs, and alcohol throughout the junior high and high school years. We feel it is imperative for each family to decide when those discussions are appropriate for each child and will not attempt to assign grade levels to these discussions.

On SchoolhouseTeachers.com

If you would like to continue to incorporate general health studies through 8th grade, you may want to consider Understanding Middle School Health, a 36-week course for 6th-8th grade.

Additionally, SchoolhouseTeachers.com offers Nourishing Nuggets, Family Nutrition, and Family Fitness classes that are designed to be done as a family with adaptations for children of any age.
**History**

The approaches to teaching history are varied, but for the purposes of this scope and sequence, we are offering an outline of two main tracks: **traditional** (following a generally chronological approach to US history and a regional approach to world history) and **classical** (a series of cycles that follows a chronological approach, with each cycle through the topics going into more depth). Remember that you can never teach every moment of history! Help your children understand the framework of history so they can continue to build on that knowledge for the rest of their lives.

You may also enjoy **Michelle Miller’s recommended reading lists for Black History Month, Courage, Hero Hurrah! and World War II**.

Our World Book Student library has a [biography center](#) where you can search more than 10,000 famous people or generate lists of people based on gender, job or achievement, country or cultural heritage, and time period. For example, students could find female explorers or male English scientists of the 1800s.

Our [World Book Timelines library](#) includes hundreds of timelines, thousands of events, and the ability to build or customize your own timeline. Some of the premade timelines include timelines of US, African, Asian, Australian, Canadian, European, Latin American, Middle East, and New Zealand history; US military history; the history of explorers; world history; history of science and inventions; and the history of literature.

Our World Book Advanced library includes a [Teaching with Documents](#) series of lessons on military history from Charlemagne to Vietnam.

*One possible way to use the history quizzes as part of your curriculum is to use the answer key as the lesson to spark independent research. For example, using the Campaign Slogans quiz, students can learn who said slogans such as, “A New Deal,” “The Silent Majority,” and “Return to Normalcy” and then use that knowledge as a springboard to learn more about these presidents, what their slogans mean in an historical context, and why they resonated with people.*
Social Studies

Some curricula treat social studies as a subject separate from history, while others incorporate it into historical studies. The ways in which social studies can be combined with history are virtually endless. When you study a period in history, look at as many aspects of daily life as you can. What jobs did people have? What were their families like? What kinds of homes did they live in? Here are some specific goals included in various curriculums that do not always fall into a course of historical studies.
Social Studies

9th-12th Grade

- Influence of social media, TV, and the Internet on our daily lives
- Impact of globalization on each aspect of how we live and work
- Impact your community (your family, friends, etc.) has on you personally
- Impact you and your community have on the world around you
- Growth of the indigenous missionary movement

Globally Connected: High School Social Studies: 18-week course

Media Socialization: 19-week course for 9th-12th grade that discusses the influence of social media, TV, and the Internet on our daily lives

Additionally, Mock Trial is a social studies class for 7th-12th grade that contains 35 topics that can be studied independently from one another for any total course length desired or taken together as one course spanning up to 70 weeks.

You may also enjoy Michelle Miller’s recommended reading lists for Patriotism and Courage.
Economics

Some curricula treat and include with their K-6th grade history/social studies specific goals regarding the teaching of economics. This can be done in a structured way or in an unstructured way as you discuss daily life, budgeting, the needs of the household, and other related topics with your children. You may enjoy Michelle Miller’s Monthly Book Lists for Families selections for Entrepreneurship & Work Ethic and Thrift & Resourcefulness. Here are some of the goals included in various curricula.
